

Mila Overview

Mila's Unique Role Is Reflected In Its Mission And Four Big Strategic Pillars

MISSION

To be a global pole for scientific advances that inspire innovation and the progress of AI for the benefit of all

Strategic pillars

AI Talent

Attract, train and retain a diversified talent pool recognized for their high expertise in machine learning

Advanced Research

Achieve the highest levels of scientific leadership in the development of novel approaches in machine learning for AI

Collaboration Projects

Contribute to projects, platforms and partnerships in collaboration with a range of organisations to accelerate economic and social innovation

Social Influence

Stimulate a democratic dialogue on the potential of AI and the importance of its ethical and responsible development

Mila Values Are The Foundations On Which Our Strategic Vision Is Built And Define The DNA Of Our Institute

Fundamental values

Are shared by a majority of researchers, employees and partners

Feed our daily actions and interactions

Influence all of our decisions and choices

Define the unique character of Mila relative to other research institutes and players in the ecosystem

Mila Is A Collaboration Between Two World-class Universities And A Worldwide Network Of Global Partners

Mila is the world's largest academic research lab specialised in deep learning and reinforcement learning

A rich ecosystem of researchers, experts, startups and AI companies

Mila must focus on certain priority sectors in keeping with its major poles of expertise

Local and international AI ecosystems are developing rapidly, both in terms of research and applied solutions development—hence the importance for Mila to anchor priority areas that set us apart and define our role
